

TCW Accounting Solutions

Driving Sustainability & Innovation Through AI

About TCW

Since 2000, TCW Accounting Solutions has offered licensed accounting and training services with a future-focused mindset. We're more than just accountants—we are strategic partners who care about our clients' growth, our community, and the planet. Whether you're a startup, a growing business, or an established organisation, we offer guidance that blends financial expertise, digital innovation, and ethical responsibility.

Our Services (Expanded Overview)

- Tax & Compliance:

We help businesses remain fully compliant with HMRC and Companies House, managing everything from self-assessments to corporation tax returns. We also offer tax planning to ensure you're optimising your allowances and reducing liabilities within legal boundaries.

- Bookkeeping:

Accurate, up-to-date records are critical. Our efficient digital bookkeeping ensures smooth operations, supports financial decision-making, and feeds directly into management reports and tax returns.

- Management Accounting:

We provide ongoing insight into your business's financial health through regular reports, KPIs, and performance analysis—empowering you to make timely, informed decisions.

- Budgeting & Forecasting:

Build forward-looking, data-backed budgets that align with your business goals. We also use AI-powered tools to simulate 'what-if' scenarios and plan for growth.

- Internal Audit & Limited Assurance:

We independently review internal systems and provide limited assurance reporting, giving peace of mind to directors, shareholders, and stakeholders.

TCW Accounting Solutions

Driving Sustainability & Innovation Through AI

- Forensic Accounting:

Our forensic specialists identify fraud, financial inconsistencies, and reporting errors. We support legal processes and internal reviews with precise documentation and expert analysis.

- Independent Examinations:

Required for many charities and non-profits, this cost-effective alternative to a full audit promotes transparency and builds trust with funders.

- Payroll Services:

We offer full payroll processing from £4 per payslip, including e-payslips, holiday pay calculations, leaver P45s, and new starter onboarding. Optional pension auto-enrolment support is also available.

- Digital Accountancy:

All services are cloud-enabled, powered by systems like Xero and QuickBooks. Clients benefit from real-time dashboards, digital document sharing, and seamless integrations.

- Consultancy:

From business structure advice to process improvement and scaling strategies, we provide objective guidance for every growth stage.

- Business Planning:

We co-create investment-ready business plans with financial projections, marketing strategy, competitor research, and more.

- Training:

Via TCW Training Services, we offer in-house and online training across accounting software, tax knowledge, and core business skills. Custom packages available.

TCW Accounting Solutions

Driving Sustainability & Innovation Through AI

Start-Up Support

Turning your vision into a viable business? TCW offers FREE consultations for new entrepreneurs, covering structure choice, HMRC registration, bookkeeping setup, software training, and initial tax planning. We're proud to have helped dozens of successful startups thrive-ethically, digitally, and affordably.

Our Commitment to Sustainability

At TCW, sustainability isn't an afterthought - it's at the core of our ethos. We are committed to reducing our environmental impact and helping clients adopt more eco-conscious business practices. From encouraging digital documentation to reducing paper waste, from promoting remote consultations to using cloud-based accounting systems, every choice we make reflects our values.

We also actively support ethical start-ups and community enterprises with a green mission, offering them affordable services and mentorship to scale responsibly. Our commitment extends to choosing suppliers, partners, and tools that align with environmental and ethical standards.

We believe accountancy can be a force for good - and we're proud to be leading the way.

AI-Driven Solutions for Modern Businesses

Innovation is in our DNA. At TCW, we embrace artificial intelligence (AI) to offer smarter, faster, and more accurate services. From automated bookkeeping to real-time data analysis, our AI-enhanced systems help clients stay compliant and agile in an ever-changing financial landscape.

We leverage machine learning tools for:

- Accurate forecasting and trend analysis
- Identifying anomalies for fraud prevention
- Streamlining payroll and reporting

This allows us to focus more on strategic advisory and less on admin - giving our clients more value from
